

Guest Membership

A work abroad often means greater responsibility for regulating the terms between you and your employer. The Swedish Association of Graduate Engineers therefore have an agreement with engineering organizations in the Nordic region and in Australia. The agreement gives you as a member, the opportunity to become a guest member of one of these organizations for, up to three years.

You will get the same rights as their standard members to get negotiation support and legal assistance in the work country. The guest membership is included in your standard membership with us and is free of charge.

If you also are a member with Akademikernas a-kassa, it's important that you contact them for more information about the conditions for your membership with them when you work abroad. You reach Akademikernas a-kassa on telephone: 08-412 33 00 or by email: utland@aea.se. For more information, you can also check their website akademikernasakassa.se.

If you wish to become a guest member, please, fill in the application on the back and send it to us. We will forward your application to the engineering organization, which will confirm the guest membership to you, when they have processed the application.

Guest Membership in a Nordic country or Australia

As a standard member with the Swedish Association of Graduated Engineers, you have the opportunity to become a guest member in another engineering organization within the Nordic region or in Australia. You can be a guest member for up to three years. You will get the same rights as their standard members to get negotiation support and legal assistance in the work country. The guest membership is included in your standard membership with us and is free of charge.
